Machine Learning For Kids :: Teachers' notes

Worksheet	Virtual Pet
Activity	Make a virtual pet in Scratch that learns to recognise what you are doing
Objective	**Teach a computer to recognise pictures** • Learn how computers can be trained to recognise an object
Difficulty level	Intermediate
Time estimate	45 minutes
Summary	Students will train a machine learning model to recognise pictures by taking photos of objects with a computer webcam. They will use this in Scratch to make a character that recognises what they are doing.
Topics	image classification, supervised learning

Setup

Each student will need:

Print-outs	Project worksheet (download from https://machinelearningforkids.co.uk/worksheets) Blocks in Scratch scripts are colour-coded, so printing in colour will make it easier for students.
Technology	Web-cam
Access	Username and password for machinelearningforkids.co.uk

Class account will need:

API keys	None

Customizing

If you use **PRIMM** approaches with your class, add a step where students predict how the project template works.
If you want to **increase the amount of coding** involved, delete some of the code from the project template and add steps to the worksheet so students code it themselves.
If you want to **encourage problem solving**, delete some of the detail in the worksheets and provide more general instructions instead.
Project template files & worksheets in MS Word format are available so you can **modify them to suit your class**.

Help

Potential issues	• Students will be taking photos and uploading them to a secure site. As long as only the objects are visible in photos they take, students will not be identifiable. If this raises concerns it may be sensible to obtain parental permission. • Machine learning models can sometimes take up to 5 minutes to train. It is okay for students to work on their Scratch projects during this time, rather than wait for this to complete first. • "https://machinelearningforkids.co.uk" is a long URL to type for some children. You may find it easier to set up a bookmark that they can click on instead. General troubleshooting and help at https://machinelearningforkids.co.uk/help
